## Experience

---

MARCH 2022 – AUGUST 2022

### **Harm Reduction Specialist and Services Navigator *Prevention Point***

Worked in the Syringe Services department of a community service organization operating according to the mission of harm reduction, compassionately assisting people who use drugs and who are often experiencing homelessness. Job required managing supplies, training and supervising volunteers, distributing supplies, harm reduction education and counseling with participants, and connecting participants to other services outside the department.

2019-2021

### **Model Builder *N-Scale Architect***

Assembled and painted N-Scale model trains and accessories for a company serving the transport modeling community, deploying fine motor skills, creative problem-solving, technical proficiency, and attention to detail. Organized my own time and the execution of projects utilizing a variety of craft and industrial materials and teaching myself new techniques as needed.

2018-2019

### **Electronic Assembler *Monome***

Provided electronics assembly for a small company making digital synthesizers. Performed a variety of assembly and repair tasks requiring fine motor skills and attention to detail--soldering, metal finishing, quality control, preparation and attachment of diverse components, and product testing--as well as packing, shipping, and paying and receiving invoices.

## Education

---
